Join us for the NJ Acts Biostatistics and Epidemiology Workshop Series:

Metabolomics in Human Cohort Studies: From Processing to Associations

Thursday, May 15, 2025, 12:00pm – 1:30pm over Zoom

In this workshop, attendees will become aware of some of the challenges in processing untargeted metabolomics data, how to apply commonly used data filtering techniques, and network analysis approaches.

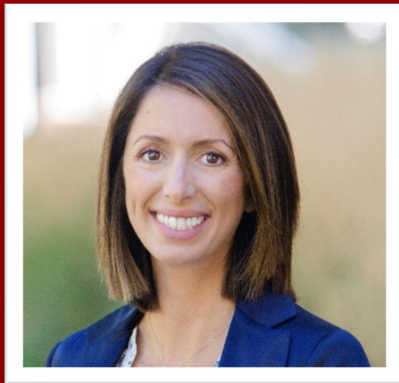

Target Audience:

Individuals with interest in using statistical or data analysis software to analyze untargeted metabolomics data.
