Join us for the NJ Acts Biostatistics and Epidemiology Workshop Series:

Mapping Adversity to Midlife Health: A Latent Class Study in Hispanic/Latino Adults

Thursday, June 19, 2025, 12:00pm – 1:30pm over Zoom

This workshop will provide an overview of latent class analysis (LCA), including when and how to apply this method in research. Participants will explore the utility of LCA through an applied example examining associations between early life adversities and cardiometabolic health.

Presenter:

**Ayana K. April-Sanders, PhD,
MPH**

Chronic Disease Epidemiologist and Faculty -
Department of Biostatistics and Epidemiology

Target Audience:

Open to all! Especially those
interested in health equity research
and latent class analysis.
