

Spring 2024

# LEARNING MENTORING

Are you a STEM grad student or postdoc,  
and committed to becoming an effective mentor?  
*Join a virtual cohort of like-minded peers!*

**Tuesdays, 10-11am ET on Zoom | Eight sessions, 3/19-5/7**

A major component of many careers -- both within and beyond the academy -- is mentoring trainees, yet graduate students and postdocs often don't have formal opportunities to develop mentoring expertise. We invite you to a **supportive learning cohort to explore skills and strategies** while developing your own, tailored approach to mentoring.

While there is no magic formula, there are **evidence-based "best practices,"** as well as field-tested ways to develop a reflective, inclusive, and tailored mentoring approach.

To learn more, [register for this Spring's cohort](#), or express interest in participating in the future, please **access this QR code**
