

# Technology Seminar Series

MaGIC and the Genomics Center presents

## **10X Genomics: Access the full richness of biological complexity with single cell and spatial multiomics**

As we navigate a century where transformative advances in biology and medicine will reshape the way we deliver human health, researchers need approaches that can keep up with the fast pace of their science. At 10x Genomics, we provide single cell, spatial, and in situ technologies that fuel scientific discoveries and drive exponential progress. Unravel highly complex systems, while bringing into focus the details that matter most, to see biology in new ways.

Join us to learn how Chromium Single Cell, Visium Spatial, and Xenium In Situ platforms from 10x Genomics can help you push the boundaries of your research. Uncover molecular insights, dissect cell-type differences, investigate the adaptive immune system, detect novel subtypes and biomarkers, and map the epigenetic landscape cell by cell. Enabling deeper insight into cancer, immunology, neuroscience, and developmental biology, 10x Genomics gives researchers the ability to see biology in new ways.
